NgRx

RxJS

Git

### HOBBIES

I try to expand my skillset in web/graphic design and stay up to date with the latest technologies. In my spare time, I take pleasure in PC building, fixing mobile phones as well as small DIY home projects. I try to be active by going to the gym, playing football, but also enjoy socialising and staying in touch with friends. I contribute to the community by translating various projects and applications from English into Polish. Staying fit and eating healthy is an important part of my lifestyle - therefore I cook pretty much all my meals which I really enjoy doing.
